Aims

Leading specialists from Russia will share the stage with the ERS leadership to discuss key issues in respiratory medicine, providing the opportunity to hear about the latest scientific developments in Russian.

This meeting is designed to update respiratory professionals on the latest developments in the respiratory field. Headsets and translated slides will be used to provide translations of the full session. There will be opportunities for questions and discussion after the presentations.

Target audience

The session is aimed at specialists in respiratory medicine from Russia. There will be simultaneous translation from English to Russian and slides will be shown with Russian text.
